

ER11/ER16/ER20/ER25/ER32 Collets

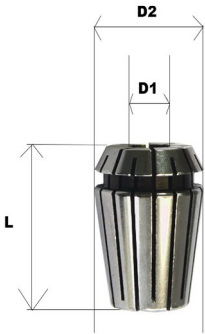

Description:

Collet is an indispensable precision component of a CNC machine tool, designed to provide solid and accurate centering of the milling cutter. It is finely engineered to ensure a high degree of concentricity is maintained throughout the milling process, thus reducing vibration and improving cutting results.

Our Product Advantages:

- Multiple dimensions to choose in one shop
- High cost-performance product
- High concentricity:0.005mm
- Material:65Mn (Hardness:HRC44~48)
- Logo laser engraving: Available
